Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

In view of the Pre-Brief Appeal Conference decision filed on 11/21/2006
PROSECUTION IS HEREBY REOPENED, as set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

SUPERVISORY PATENT EXAMINER

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 9-10 and 12-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Ananda (US 6,385,731).

Independent Claims

Claim 1. Amanda teaches a method for a vendor to dispense postage over a network to a remote personal computer, the method comprising:

obtaining a meter license from the Post (C. 27, L. 24-29), said meter license being associated with a meter account assigned to the vendor (C. 22, L. 1-44), said meter account being maintained at a data center (C. 22, L. 45-49);

receiving, via the network, a transaction request for postage from a customer using the remote personal computer, said transaction request including information from the customer, said information corresponding to the transaction requested and payment method (C. 5, L. 44-48);

processing the requested transaction by requesting the data center to create evidence of postage payment and to account for the created evidence of postage payment in the meter account assigned to the vendor (C. 5, L. 48-51; C. 22, L. 16-32);

effecting payment for the transaction based on the information received from the customer (C. 5, L. 48-51; C. 22, L. 16-32);

Art Unit: 3628

receiving the evidence of postage payment created by the data center; and sending the evidence of postage payment to the remote personal computer for use by the customer (C. 5. L. 48-51).

Claim 10. Amanda teaches a method for a vendor to dispense postage to a remote personal computer via a network comprising:

receiving a request for postage from a customer using the remote personal computer coupled to the network (C. 5, L. 44-48);

processing the request for postage by requesting a data center to create evidence of postage payment and to account for the created evidence of postage payment in a postal account assigned to the vendor (C. 5. L. 48-51; C. 22, L. 1-32);

sending the evidence of postage payment to the remote personal computer customer via the network for use by the customer (C. 5. L. 48-51).

Claim 14. Amanda teaches a system for dispensing postage over the Internet to a remote personal computer for printing, the system comprising:

a data center accessible over the Internet (Fig. 12; C. 22, L. 45-49);

at least one metering account licensed to a vendor and maintained at the data center (C. 22, L. 1-44; C. 27, L. 24-29);

means at the data center for receiving over the Internet a request for postage, the request being initiated by a customer of the vendor using the remote personal computer (C. 5, L. 44-48);

means at the data center for generating evidence of postage payment in response to the request for postage (C. 5. L. 48-51);

means at the data center for accounting for the generated evidence of postage payment in the metering account licensed to the vendor (C. 5. L. 48-51; C. 22, L. 16-32).

Dependent Claims

Claim 2. The method of claim 1, including determining an origin of deposit postal code for the requested transaction (C. 22, L. 18-21).

Claim 3. The method of claim 1, wherein the information from the customer includes a username, password and credit card information whereby a personal account is established for subsequent transactions (C. 8, L. 59-67; C. 22, L. 45-49; C. 27, L. 24-34).

Claim 9. The method of claim 2, wherein the origin of deposit postal code is included in the information from the customer (C. 22, L. 18-21).

Claim 12. The method of claim 10, wherein receiving a request for postage from a customer further comprises: receiving information to identify the customer (C. 8, L. 59-67; C. 22, L. 45-49; C. 27, L. 24-34).

Claim 13. The method of claim 12, wherein the information to identify the customer includes at least one of a user name and a password (C. 8, L. 59-67; C. 22, L. 45-49).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ananda in view of Official Notice.

Dependent Claim

Claim 11. Ananda teaches all the limitations of the claim 11, except specifically teaching that the evidence of postage payment includes *a transaction number*.

However, Ananda teaches that database 1213 comprises system usage log to log every postage metering transaction (C. 22, L. 54-55).

Official notice is taken that it is old and well known to identify a transaction by a transaction number.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Ananda to include that said database 1213 comprises system usage log to log every postage metering transaction and *transaction number*, because it would advantageously allow to identify a particular transaction in case of necessity.
